ALL UP IN YOUR GRILL ABOUT SAFETY

BY AARON WEIDMAN

It's the middle of summer, do you know if your grill is in prime condition to host a BBQ with friends and family? You know Work Right wants you PREPARED for every occasion. So here are some tips for you to Review Your Hazards when it comes to grilling this 4th of July so you can appear to be in mid-season form.

- ✓ **Tongs/Spatula** - Proper utensils for whatever you put on the grill.
- ✓ **Towel/Apron** - Wear that apron or keep a towel on your shoulder, and BAM, your perfect 4th of July shirt gets to be the talk of the party all afternoon.
- ✓ **Shoes** - We know you're out in the sun and like to wear flip-flops, but grease drippage or hot coals dropped on your bare foot can be painful.
- ✓ **Water** - Make sure you have some water on hand to not only control those flare-ups on your grill but also quench your thirst.
- ✓ **Beverage in a koozie** - How about the other beverages people like to partake in at a holiday BBQ? We can't have your beverage getting too warm and becoming far less refreshing.
- ✓ **Grill Glove** - Keep your flip hand protected with a grill glove and avoid the burnt hair smell.

Aaron Weidman, PREPARED for Grilling

- ✓ **Sunscreen/Hat** - Protect yourself with sunscreen and a hat so you can enjoy the party for yourself after your grill duties are over.
