# THE WONDERFUL WORLD OF KEN-JURY PREVENTION

According to a 2020 study, 82% of men try to stay healthier to live longer for family and friends. However, only 50% of men engage n using preventive care. My fellow men, WHAT ARE WE DOING!? Life finds a way. The odds of us being born, according to some scientists, is about 1 in 400 million. Pretty low odds to be honest. The odds of dying, well, those are more clear. It's the circle of life and it moves us all (Ingonyama nengw' enamabala).

Why are we not taking advantage of the low hanging fruit of preventative care!? Ignorance is bliss. I get it. It can be scary to get these screenings and wellness checks completed because of the fear of the outcome, but we need to set aside our egos and do what needs to be done.

### **KEN-FRIENDLY WAYS TO START**

**Regular physical exams:** That means, establish yourself a doctor. If you're younger than 50 and healthy with no pre-existing conditions, schedule exams every 3 years. If you're over 50, you should be scheduling yearly checkups.

**Cholesterol and Blood pressure:** I *aorta* tell you how important your heart is. A couple of ways to keep an eye on your hearth health is through blood pressure testing and getting your cholesterol checked. Both can be done at your annual exams. You can even keep an eye on your blood pressure by visiting your friendly neighborhood Work Right Injury Prevention Specialist.

### **GETTING A LITTLE MORE KEN-TENSE**

Now you're a bit older. With age comes time to get a few more tests done. The uncomfortable ones, pun intended. Time to invite your friend Ben Dover to your next appointment.

**Colon Cancer Screening:** A colonoscopy is the traditional method to identify cancerous polyps, especially if you have a family history of colon cancer. However, advancements in medical technology have developed a noninvasive take home test to screen for colon cancer. So you can tell Ben Dover to back off! Remember, regular colon screenings are still recommended from age 45 through 75.
